Thank you Lynda. That too is helpful.

If available, we are interested in obtaining your model's node density / grid so we can understand how it applies to Mission's source term area.

Also, if there is a stand alone complete modeling report that documents the modeling that has been done, we would like to obtain a copy of that if possible.

Finally, could you also please provide me with indexes reflecting all records in EPA's possession concerning Omega OU2 - specifically in relation to each of the following PRPs? (Please let me know if you require a FOIA request for the indexes).

Omega PRP Organized Group ("OPOG")

Angeles Chemical Co.

Bodycote Thermal Processing, Inc

Burke Street LLC

C.P. Chemicals, Inc.

Chrysler LLC

Earl Mfg. Co., Inc.

First Dice Road Company, a California Limited Partnership

Foss Plating Company

Greve Financial Services, Inc.

McKesson Corporation

Mission Linen Supply

Palmtree Acquisition Corporation

Phibro-Tech, Inc.

Pilot Chemical Corp.

Union Pacific Railroad Company

Thank you for all of your assistance regarding the above.

David

Hello David,

From our Contractor, this is my understanding:

The Omega OU2 groundwater flow model was prepared using FEFLOW (Diersch, 2005), a finite element code.

The Omega model extends over the eastern portion of the Central Basin and is based on a USGS model (Reichard et al., 2003) of the Los Angeles Basin.

The Omega model is refined to represent OU2 conditions; it has 13 layers.

Hope you find that helpful.

Lynda

Thank you very much for the fast response Lynda. This is very helpful.

I will speak with the Mission folks and get back to you about the modeling.

In the meantime, please let me know what software you are using to see if we already have that.

Thanks again.

David

Hello David,
here is a List of OU2 PRPs that I had readily available from an earlier request

I hope this is helpful.

Yes, we do have a groundwater model, but you would need the software, the input files etc.

Let's discuss what you are looking for, and what we can provide that will be useful.

Lynda

Lynda:

Could you please provide me with a list of OU2 PRPs at your earliest convenience?

Also, does EPA have any groundwater modeling available for review?

Please let me know.

Thank you.

David
